WORK EXPERIENCE

Jr. Software Engineer

T.E.J. Center Pvt. Ltd.

Kupondole, Lalitpur

Jan 2026 - Present

- Developed scalable mobile application features using React Native and TypeScript focused on interactive learning experiences, modular architecture and maintainable code structure.
- Built core learning functionalities including dynamic content generation, multilingual support, and audio-driven educational experiences to improve accessibility and user engagement.
- Implemented property-based Jest tests to validate edge-cases improving application reliability and reducing production bugs.

Software Engineering Fellow

TEJ Fellowship

Kupondole, Lalitpur

Jun 2025 - Dec 2025

- Built and deployed full-stack web application using React and Node.js, implementing REST APIs, UI components, and database integration for complete feature workflows from frontend to backend.
- Contributed to feature development in a monorepo-based team environment, maintaining shared codebases and ensuring consistent development and integration workflows.
- Collaborated with peers on system design and feature implementation, gaining exposure to real-world software engineering workflows including API design, deployment, and iterative product development.

Beta Microsoft Student Ambassador

Microsoft

Remote / Nepal

Sep 2023 - May 2025

- Mentored students and conducted interactive, hands-on sessions focused on challenge-based learning activities on-campus, supporting practical skill development and engagement.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C, C++

Frontend: React, Next.js, React Native, Redux Toolkit, Tailwind CSS, React Query, Socket.io, Jest, Playwright

Backend: Node.js, Express.js, REST APIs, Redis, WebSockets, Kafka

Databases: PostgreSQL, MongoDB, Firebase, Prisma ORM, NeonDB, AlloyDB

AI / ML: LangChain, LangGraph, RAG, Pinecone, MCP, Prompt Engineering

DevOps / Cloud: Docker, CI/CD, GitHub Actions, Azure

Soft Skills: Problem-solving, Collaboration, Decision-making, Communication

PROJECTS

Mailchimp RAG Chatbot

- Built a RAG-based chatbot using Node.js and LangChain to automate Mailchimp support, implementing hybrid search (BM25 + Semantic) for accurate and context-aware document retrieval.
- Added conversational memory for multi-turn interactions and developed a react interface to visualize queries and responses.

Movie Ticket Booking System

- Designed and implemented a scalable backend for movie browsing, booking, and payments using redis-based locking and kafka to handle high concurrency.
- Integrated Stripe for secure payment processing while ensuring consistency and reliability in the booking workflow.

Job Search Portal

- Developed an AI-powered job aggregation pipeline that automatically collected, processed and categorized job listings from multiple ATS providers using n8n, REST APIs, Gemini AI and Google Sheets reducing manual effort and streamlining job data processing.
- Built a responsive job search platform using React.js, implementing dynamic search, filtering, pagination and reusable component architecture to deliver a seamless user experience across desktop and mobile devices.

LEADERSHIP EXPERIENCE

University Lead

CS50xNepal

Nepal

May 2024 - May 2025

- Mentored 60+ students in hands-on projects and guided 100+ participants at X-Hack3.0, a national level CS50AI hackathon, in developing AI-driven solutions.
- Organized multiple mini-hackathons, technical workshops, and the CS50x Hackathon, fostering student engagement, problem solving and project execution.

President

Electronics & Communication Engineering Student Society

Dharan, Nepal

May 2024 - May 2025

- Contributed to the organizational growth by organizing different tech events, raising fundings, and managing resources efficiently, ensuring financial sustainability and asset continuity for the next committee.
- Led 5 major technical events and collaborated with five student societies to deliver hands-on training, student-led projects, and skill-building programs across software and hardware domains.

Github Field Day Nepal

National Tech UnConference

Kathmandu, Nepal

Nov 2024

- Engaged with tech leaders to discuss technical challenges, shared best practices, promote inclusivity, foster collaboration, and support sustainable student-led tech initiatives.

EDUCATION

University of Helsinki, Finland

FullStackOpen

Jun 2025 - Dec 2025

Certificate

- Completed a comprehensive full-stack web development course covering React, NodeJs, Express, PostgreSQL, and modern web practices.
- Applied technical expertise to build scalable web applications through hands-on projects.

Tribhuvan University, Institute of Engineering(IOE), Eastern Regional Campus

Bachelors in Electronics, Communication and Information Engineering

Dharan, Nepal

May 2021 - May 2025
